Attempt : 1
Total Mark : 10
Marks Obtained : 10

Section 1 : Coding

1. Problem Statement

Monica is interested in finding a treasure but the key to opening is to get the sum of the main diagonal elements and secondary diagonal elements.

Write a program to help Monica find the diagonal sum of a square 2D array.

Note: The main diagonal of the array consists of the elements traversing from the top-left corner to the bottom-right corner. The secondary diagonal includes elements from the top-right corner to the bottom-left corner.

Input Format

The first line of input consists of an integer N, representing the number of rows and columns.

The following N lines consist of N space-separated integers, representing the 2D array elements.

Output Format

The first line of output prints "Sum of the main diagonal: " followed by an integer, representing the sum of the main diagonal.

The second line prints "Sum of the secondary diagonal: " followed by an integer, representing the sum of the secondary diagonal.

Refer to the sample output for formatting specifications.

Sample Test Case

Input: 3
1 2 3
4 5 6
7 8 9

Output: Sum of the main diagonal: 15
Sum of the secondary diagonal: 15

Answer

```
import java.util.Scanner;
class DiagonalSumOfSquareArray {
    public static void main(String[] args) {
        Scanner scanner = new Scanner(System.in);

        int size = scanner.nextInt();

        int[][] arr = new int[size][size];

        for (int i = 0; i < size; i++) {
            for (int j = 0; j < size; j++) {
                arr[i][j] = scanner.nextInt();
            }
        }

        int sum = 0;
        for (int i = 0; i < arr.length; i++) {
            sum += arr[i][i];
        }
    }
}
```

```
        }  
  
        int sum1 = 0;  
        for (int i = 0; i < arr.length; i++) {  
            sum1 += arr[i][arr.length - 1 - i];  
        }  
  
        System.out.println("Sum of the main diagonal: " + sum);  
        System.out.println("Sum of the secondary diagonal: " + sum1);  
  
        scanner.close();  
    }  
}
```

Status : Correct

Marks : 10/10
